Dr. Sachinidis and Dr Kontouli,

Once again we want to thank both of you for the excellent care that Alberta received from you while we were in Athens. You were both a blessing to our family and we enjoyed getting to know you.

The trip home went very well. Very good taxi and wheelchair service in the airports all the way.

We arrived home on Saturday afternoon and because of Lisa's connection with our family doctor were able to see her new nephrologist, Dr. Richard Foley, on Monday, September 14, morning.

They ran blood tests, did a 24 hour urine analysis and did a renal ultra scan. We had a follow up visit this past Monday, September 21. The creatinine was 2.37, BUN 32, and eGRF 20. Dr. Foley thinks she is recovering nicely and wants to see her for a follow up visit in one month. She is doing well and has been out and about several times this week. I think she is regaining her strength and feeling better each day.

Sincerely,

Jack, Alberta, and Lisa
